

Embedd. Fanless PC FL2022C Guida DIN i3-1115G4 Cpu P/N: PCF13

Constantly evolving, our Embedded and Fanless Computers exploit advanced technologies and make themselves suitable and reliable in the most varied applications for industrial automation. We offer Embedded solutions for any type of need and we are able to develop Custom projects based on specific needs of our customer. With Fanless solutions, the total absence of fans ensures correct and long-lasting operation over time even in particularly critical and dusty environments. Many of our Industrial PCs also provide the possibility of using wall, VESA or DIN rail mounting and with low voltage power supply, the ideal solution for installation inside electrical panels.
